

Examples: Customised Design

Link chains with highest claims on steel (stainless & heat resistant), all possible surfaces, heat treatments, reliability

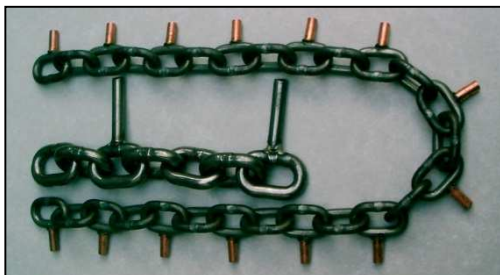

Link chains for industrial washers

Link chains for spiral conveyor
in cooling and heating systems

Link chains for hook conveyors

Link chains with welded on driver
for special conveyor systems

Examples: Customised Design

Link chains with highest claims on steel (stainless & heat resistant), all possible surfaces, heat treatments, reliability

Welded chain sack (e.g. collecting purposes)

Loop security chain for locks and attaching points (round-, square- and hexagonal style)
also with sleeve if necessary

Security chain for lock systems
(round-, square and hexagonal style - e.g. window security)

Bending parts for vehicle construction

Examples: Customised Design

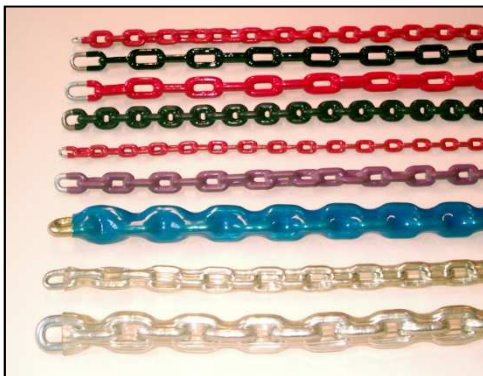

Link chains with highest claims on steel (stainless & heat resistant), all possible surfaces, heat treatments, reliability

Welded / assembled building groups

Pump chains (e.g. lifting or lowering pumps in fluid media for maintenance purposes) of nearly any dimension

Shrinkdown plastic tubes / plastisol coating as example for special surface besides standard surfaces

Technical changes subject to alterations. All specifications without engagement.
